

# Embedded WDM – So how does it work?

smartoptics

**ITS SO SIMPLE!** Just three easy steps for simple and cost effective SAN / WAN extensions:

**Coloured CWDM SFP/SFP+** connected directly in SAN/IP equipment

**CWDM Mux/Demux** units to combine/split wavelength channels – [no power required](#)

**LC-LC Patch cord** from transceiver to Multiplexer – [no new points of failure](#)
